PREFACE

It is a pleasure to have to offer to numismatists such a fine collection of the early coins and medals of America as are contained in this splendid old collection of the late Hon. George M. Parsons and others.

Among the Colonial Coins there are several coins which have not been offered for many years, and the student in this most interesting series must have been greatly impressed by the few real gems that have been offered for public competition in the past few years. The series of Historical Medals relating to the early history of our country is one that is highly interesting and records events of the greatest importance—it is a series that commands the attention of the historian as well as the collector.

The Pattern Collection is quite extensive, and one which is coming up fast in popularity. The collection of Washington Coins and Medals is one of the finest ever offered. United States Coins contain many examples of great beauty on account of their high state of preservation.

The superb example of that great rarity in the Canadian Series, the 1670 Quarter Crown, GLORIAM REGNI, will be a delight to the fortunate purchaser "across the border," as also the 1756 jeton in silver from hitherto undescribed dies. The United States Fractional Currency is one of the finest collections of this popular branch of collecting, which I hope will receive the attention it deserves.

I have endeavored to describe the coins as I see them, without favor to the seller or buyer, and so the description may not mislead the latter, have carefully noted the defects or evidences of wear that are on the coin. This great care is of value to the intending buyer, who, I am glad to be able to say, feels that he will get a coin meeting the description, hence, he bids its value to him and is not disappointed when those bought by or for him arrive.

Collectors desiring further information than the necessarily brief description incident to a public sale catalogue will please communicate with the undersigned, who will gladly make answer.

Bidders will please examine and compare their bids before sending them in, as mistakes made by them will not be borne by the cataloguer

or auctioneers; also sign your name and address to your bid sheet. Forward your bids as soon as possible.

I will carefully execute bids entrusted to me for 5% *of the sum purchased*—no charge made on lots not bought.

The auctioneers will execute bids free of the above commission, but they are not numismatists and do not know the value of the lots, so simply execute the orders given, assuming no responsibility and requiring payment to be made in advance of their sending the goods.

Every coin, medal or note is sold so much each piece, except where lot or set or proof sets are stated.

Because this is a great sale do not let that fact deter the small buyer from sending in his bids—all are welcome and will be thankfully received—the large and the small; and here permit me to draw attention to there being such a varied offering that I believe there should be some item in the following 2,756 lots on which every one receiving this catalogue could make a bid. The cost of publishing this catalogue has been great, and I hope collectors will show their appreciation of my efforts at pleasing them, as well as making business for myself, by either sending in some bids or attending the sale in person or commissioning myself or others to represent them.

Any one who receives one of the catalogues and has no use for it, or subsequent catalogues, will confer a favor by returning it.

I appreciate greatly the loyal support given me in the past, and it is my aim to strive to merit a continuance of the same.

Prior to June 27th, the illustrated catalogue may be obtained on payment of \$3.00. After the sale the illustrated catalogue may be obtained with a list of prices obtained bound in at the back on payment of \$1.00.

After the sale a printed list of prices obtained at the sale may be had on payment of \$1.00.

After the sale the plain catalogue with list of prices obtained bound in may be had for \$1.25.

TERMS OF SALE

The sale is made for cash on delivery of the goods, which may be obtained at the termination of each day's sale, or at the end of the sale on the 27th.

The highest bidder to be the buyer.

Should a dispute arise and the disputant has a voucher and is willing to advance on the price at which the lot was stricken off, then the said lot is to be put up again and sold to the highest bidder.

The auctioneers reserve the right to refuse the bid of an individual if he declines to make a cash deposit or pay sum bid on their request to do so.

No lot is separated. All are sold subject to the catalogue description and by the catalogue numbers. Should any lot become misplaced, the buyer does not acquire any right in it if it is stricken off without the mistake being discovered, and such a lot must be returned to the auctioneers.

Every item is guaranteed genuine, and this holds good indefinitely.

Every lot sold so much each piece, except the proof sets.

No coins shown during the progress of the sale unless to oblige a special request. Any one wishing to see a lot will be given every opportunity to do if possible.

Collectors are requested to carefully examine the coins during the exhibition, marking their catalogue, thus being prepared, as the sale proceeds at the rate of about 200 lots to the hour.

NEW JERSEY.

Coins probably struck in Dublin, Ireland, 1678, during the reign of Charles II, and not meeting with favor there were brought in quantity to America, 1681, by an immigrant, one Mark Newby, who settled in New Jersey, and by an Act of May 8, 1682, they were made to pass current in this Colony of New Jersey. On one is found an S below the figure of St. David, and Dr. Nelson thinks this probably denotes the year of 1678, for they were specifically mentioned in Act of the Isle of Man, June 24, 1679, wherein their circulation was ordered to cease.

St. Patrick standing, mitred, a trefoil or shamrock in his right hand, and by which he is illustrating the Holy Trinity—Three in One—to the multitude standing before him, a crozier rests in his left arm; behind or to his left the arms of the City of Dublin—six castles. Very fine, remarkably so for this coin. *Plate* Crosby, plate III, 8. Maris I-A.

- 35 (1682) Half penny. Type as last, but legend larger—the word FLOREAT before the crown and between the crown and head of David is . * . 11 cords to harp. Poor. Rare.

CAROLINA.

- 132.00 46 1691 Half penny. Elephant standing on the ground, facing left. R. GOD : PRESERVE : CAROLINA : AND THE : LORDS : PROPRIETERS. 1691 in six lines. Edge plain, borders milled. Proof. Beautiful light olive color; traces of original color in the letters on the reverse. Weight, 142½ grains. A superb piece and the finest of the three known. It is truly remarkable the condition this coin is in, and it has excited the admiration of collectors when exhibited. Of the three known, one has been forever withdrawn from competition, being in the Appleton Collection, donated to the Massachusetts Historical Society; the other in the Parmelee Collection was sold in 1890, but its present whereabouts is unknown to the writer. Crosby, page 338, speaks of knowing but the Appleton and Parmelee specimens; where or when Mr. Parsons obtained this no information accompanied it. This coin with PROPRIETERS (Sic) must not be confounded with that which follows with the word changed in the die and made PREPRIETORS. *Plate.* Crosby, plate IX, No. 1.
- 16.00 47 1691 Half penny. Obverse as last. R. GOD PRESERVE CAR(OLIN)A AND TH(E LOR)DS PROPRIETOR(S) 1694. Good, but slightly eaten by corrosion on obverse and on reverse. The letters in parenthesis do not show. Extremely rare.

PROVINCE OF MASSACHUSETTS.

- 37.00 98 1776 Pattern half penny. PROVINCE OF (M)ASSA. (The letters VINCE OF worn off almost entirely—trace shows.) Nude Indian standing to left (head not struck up) in the act of using his bow. R. D. . . Ratis probably for DEFENSOR LIBERATIS. Seated figure of Liberty to left, a globe at her right, against which she leans, a right arm extended, while she supports a staff of Liberty in her left; before her in the field a dog; beneath 1776. Poor or rather rudely struck over a half penny of George II for Ireland. The II above the bow are the numerals after GEORGE'S II. *Unique!* The rest of the set of these patterns for the coinage of the Province of Massachusetts are pictured in Crosby, plate VII, Nos. 7 and 8, the former being in the Appleton Collection, and the latter sold at my Stickney Collection Sale; on this Janus head half penny the word MASSA. is spelled same as on this coin, and on the former there is a figure of Liberty just the same, even to the dog at her feet, and this dog is on all three. Crosby speaks of them on page 303. They are evidently of native manufacture, and their crudeness more than likely precluded their issuance as money, and also accounts for there being but one example known of each die. Note.—This coin was discovered by Mr. Howland Wood, and first brought to public notice in *The Numismatist*, June, 1911, page 228, where it is pictured, and is not part of the Parsons Collection. While the property of Mr. Wood, he has placed no limit upon it, and orders it sold to the highest bidder. *Plate.*

NOVA EBORAC CENTS.

- 165,00 202 1787 Cent. * * NOVA EBORAC * (New York). Large male laureated and mailed bust facing r. R. * VIRT . ET LIB * (Virtue and Liberty). Liberty seated on a globe facing left; her right hand extended and holding an olive branch; her left supports a staff of Liberty, while resting against her at the back is a shield charged with the State arms—the sun rising from the hills, below 1787. Dies slightly sunken in center, which was the cause of so few being known from these dies. Uncirculated. Beautiful light olive. Proof-like surface. I fully believe this to be the finest example known of this very rare variety, which must not be confounded with the common varieties next following. Plate. Crosby, plate VIII, 9.

- 1,20 204 1787 Cent. Same obverse as last. R. Liberty seated facing right, otherwise as last. Curious planchet, having considerable brass mixed with the copper. Three defects in planchet on obv., but reverse struck from a perfect die without the usual break. Fair.
- 1,10 205 1787 Cent. As last, but from the die after it had broken from right side near date to top of B. Very good.

Possibly an original, as the edge is free from the word QUIVRE or BRONZE.

WASHINGTON—NEW JERSEY CENT.

- 221 (1785-1787) Cent. GEN. WASHINGTON. Bust of George Washington in uniform r. R. * E * PLURIBUS * UNUM * U. S. shield. Very fine. Light olive color. Small hole between w and a, not removing any of the letters on either side. This coin is evidently a pattern, as no issue was regularly coined bearing this remarkable obverse, but it was used in conjunction with two other reverses, as shown by Crosby on plate VII. This reverse was regularly used by the State of New Jersey in 1787, as Maris No. 6-c. This combination is Maris 4-c, where he speaks of it as only known in *one* example. So it was until this piece was discovered. Of great rarity, interest and value. The other known is fine, of a dark olive color and is forever out of the market, as it is in the Robert Garrett Collection at Princeton University, N. J. Plate.

NEW JERSEY.

Arranged and numbered according to the work by Dr. E. Maris' folio, published Philadelphia, 1881. The degrees of rarity of Dr. Maris were based on his knowledge of their scarcity, gained by collecting this series for a period from 1867-1881, and should prove of great value in determining the value of the coin. As Dr. Maris' Collection was sold as an entirety to Mr. T. H. Garrett, and is deposited at Princeton University, thus removed forever from sale, it should advance the degrees of rarity on the following as a financial possibility.

An unusually fine collection, one that it has required much time and expense to form and which it would be difficult to duplicate, so it seems a pity to dismember it without an opportunity being afforded of their being kept together, so it has occurred to me that if a bid of \$250 is made (I consider this a low estimate of their value) the entire set from No. 222 to No. 302 will be started as an entirety.

2.75	252	1787 34-j. Perfect die. Fine. Blister in the planchet under front of plow beam. While Dr. Maris places this as common, I have never found it so, and as fine a specimen as this decidedly scarce.

- 8.75 295 1788 66-*r*, rarity 5! Dr. Maris had seen but 3 of this combination. Fine. Slight chip off of obverse surface above RE. I quite concur in the estimation of rarity placed on this piece by Dr. Maris, and have always considered it an exceedingly rare coin.

J. cents, a far superior specimen than that owned by Dr. Maris, as this shows the date, and with the exception of the one word noted above, all the inscription which is not confused as was his.
- 2.75 299 1787 75-*bb*, rarity 2! The rare variety, with a small horse preceding the legend on the reverse. Die broken along edge from cinquefoil at end of plow handles to near the date, and on reverse along the edge over UNV. Very fine. Light bronze color. Very rare. Plate.

EARLY PATTERNS FOR THE COINS OF THE UNITED STATES.

- 1650 327 1776 Dollar. Sun dial, below MIND YOUR BUSINESS; enclosing this
are double lines, between which FUGIO—the Sun, whose rays de-
scend upon the dial, while below are E G GETZ for Edward Getz,
engraver or maker. Around, outside and enclosing the above
CONTINENTAL CURRENCY 1776. R. Thirteen circles interlinked,
each charged with the name of one of the original thirteen
States; in the center, AMERICAN CONGRESS WE ARE ONE, the field

between this device and the links being filled with rays. Borders beaded. Edge ornamented with twin olive leaves. Pewter. Uncirculated. Sharp impression. A superb example of this very rare and most interesting coin, which should be the starting coin of a United States collection. It is noteworthy that the *paper money* issued February 17, 1776, by the Continental Congress for \$1.6, \$1.3, \$1.2, \$2.3 bore the same devices on it, and the dollar values did not, this causing the inference to be drawn that it was their intention to issue a coin—this one for the dollar—to be in silver, but for lack of the metal printed that and other denominations on paper. Only two are known in silver, one of which I sold in the Earle Collection, 1912, for \$2,200. Plate.

- 328 1776 Dollar. Same design as last, but different dies. Without E G FECIT. Currency spelled with two r's. Pewter. Very fine. Rare. Plate. Crosby, plate VIII, 16.

- 332 1783. Cent. Similar obverse. R. NOVA CONSTELLATIO Eye in center of double set of rays, which intersperse another set of larger heavy rays that are separated by stars. Extremely fine, practically uncirculated. Light olive. Plate. C. 3-C.
- 333 1785 Cent. LIBERTAS ET JUSTITIA. 1785. U S in large script letters intertwined, enclosed in an endless wreath of twin olive leaves. R. As last. Uncirculated. On a remarkably large planchet, being size 19, while the regular one is size 17. Broad margin outside of letters, and on reverse beading completely around the border. Light olive. Unique in this size. Plate. C. 1-B, rarity 3.
- 334 1785 Cent. As last, but smaller planchet, size 17. Very fine.

- 1.20 335 1785 Cent. Similar to last, but no period at either side of the date. R. NOVA CONSTELLATIO Eye in center of a glory of thirteen groups of fine thin rays, each divided by a star. No punctuation on either side. Uncirculated. Partly original color, and the finest example I have met with of this very rare variety. Plate. C. 2-A, rarity 4!
- 2.20 336 1785 Cent. Similar to last, but with a period at either side of the date. Uncirculated. Nearly full original red color, turning in places slightly steel color. A wonderful example, and like the last the finest I have seen. Plate. C. 3-B.

Scroll border on obverse, and dotted border on reverse, a fact not mentioned by Baker, and it is possible he never saw the

example he speaks of. Tin. Probably unique, as Baker knew of only the Edwards Collection specimen, and I have never met with another; so this is probably that example. 32.

- "First United States cent, known as the Ring or Franklin cent. July 6th, 1787, the United States Government ordered the minting of its first coin. Messrs. Groome & Platt, of New Haven, Conn., did some part of the coinage. About the year 1860 the undersigned found (and still retains) the original dies among their effects in New Haven. The dies were taken to Waterbury, Conn., and a few coins struck for cabinet specimens, the enclosed being one of the restrikes. Horatio N. Rust, Chicago, 1875."
